

REMARKS

Please enter this Amendment and Response, which argues that the prior art cited by the examiner (i.e., Dempski and Conte) does not pertain to the critical elements disclosed in the present invention such as rapid onset of drug action and tablet content and configuration, all of which affect medical utility and would not be obvious to a person having ordinary skill in the art.

Favorable action on the merits is respectfully requested.

Respectfully submitted,

Alan A. Rubin, Applicant with
